TITANESS Tumbler / Bar / Bowl

この度は、お買い求めいただきまして誠にありがとうございます。ご使用前に取扱説明書をよくお読みの上、正しく使用してください。お読みになった後は、必ず保管してください。

How to use

TITANESS Tumbler / Bar / Bowl series are made of thin titanium double-walled vacuum structure that delivers superior performance of thermal insulation. You do not have to precool or preheat to use the item. Especially Bottle Keeper, just put a bottle that is chilled enough in the refrigerator and you do not need to use ice or water in it.

Precautions for safe handling

Warnings

- Use only for intended purpose.
- The product may be scratched or dented if dropped or hit strongly. This may lead to injury or poor insulation.
- To avoid burns and discoloration, do not place on heat sources.
- Do not heat in a microwave oven. This could damage the microwave oven or cause a fire.
- Do not clean with a dishwasher or dish-dryer. This may cause scratches or deformation. Handwashing is recommended.
- Do not leave contents inside for long periods. This may cause corrosion.
- Do not modify or redesign.
- Keep out of reach of children.

Cautions

- To avoid burns, be very careful with hot food and drinks.
- Put on a stable surface.
- When subjected to sudden temperature changes or high humidity, condensation may form on the surface.
- Stop using the product if you have an allergy to titanium.
- The ceramic texture of the surface is created by conditioning inside a vacuum furnace.

Material: Titanium

Made in Japan

How to clean

- Do not use for boiling.
- To prevent scratches and discoloration, do not rub the surface with a metallic brush or abrasive cleanser.
- To clean lipstick stains, use cleansing oil first, then wash thoroughly.
- Wash the container with a soft sponge and neutral dishwashing detergent before first use.
- Wash the container thoroughly after use with a soft sponge and neutral dishwashing detergent.
- Wipe off any water and keep in a dry place.
- Keep away from high temperatures and humidity.
- In case of tough stains, pour diluted chlorine bleach and leave for a few hours.
- To avoid discoloration, do not use oxygen bleach.
